

Description

"The atmosphere and the greenhouse effect" workshop guides students in discovering the composition of the Earth's atmosphere and the role of greenhouse gases.

The programme also introduces concepts such as climate change, decarbonisation and achieving net-zero targets.

Methodology

Interactive experiments and demonstrations enable students to understand the characteristics of greenhouse gases and their impact on the climate.

Objectives

- Understand the relationship between human activities and climate change.
- Encourage the search for sustainable solutions.
- Increase awareness of decarbonisation and net-zero targets.
